

ChartConnect Products

ChartConnect's community-based, online tools help physician practices and hospitals share and manage health information. With interfaces with hospitals, labs, radiology and transcription, we connect entire healthcare communities to build the most easy-to-use online patient records available for patient care, anywhere. Our modular approach allows each practice to choose the functionality they want and need – always with the option to upgrade to a full-featured EMR. ChartConnect applications include:

ChartConnect ResultManager – *ChartConnect ResultManager* provides a shared messaging system connecting physicians with their laboratory, radiology and hospital partners. The secure, online application allows providers to manage, act on, and maintain a record of results and reports.

ChartConnect MedManager – *ChartConnect MedManager* allows physicians to better manage their patients' medications by presenting all drug-related information about a patient electronically, in one place. Approved by the Washington State Board of Pharmacy, the online application allows a physician to quickly and easily prescribe and refill prescriptions using any pharmacy in the community.

ChartConnect OrderManager – *ChartConnect OrderManager* allows physicians and their staff to quickly and easily place lab and radiology orders from participating community laboratories and radiology centers with time-saving features such as a diagnosis-driven order list, and patient-specific order templates.

ChartConnectEMR – *ChartConnectEMR* includes all of the features of the *ResultManager*, *MedManager*, and *OrderManager* and more. A complete patient management tool, the Electronic Medical Record features a full set of productivity and decision support features in an intuitive, easy-to-use online tool that is accessible anywhere, anytime.

ChartConnect CommunityManager – *ChartConnect CommunityManager* is the practical, proven solution that Regional Health Information Organizations (RHIOs) and other groups of health care providers have been looking for, featuring the straightforward technology needed to connect the many disparate sources of patient data in a community. Information is delivered directly to community physicians' existing EMR applications, or to ChartConnect's easy-to-use *ResultManager* or *ChartConnect EMR*.

"ChartConnect is delivering what others didn't – a product that a significant number of providers are actually using."

- Rand Wortman, CEO of Kadlec CEO Hospital

"With ChartConnect, we received improved processes, time savings, budget savings, improved customer service, better organized medical record and staff with less stress."

- David Strutz, Director of Mid-Columbia Medical Associates

"Before ChartConnect my desk always had a huge stack of charts. Now, there's maybe one chart."

- Dr. Michael Pattillo, Three Rivers Family Medicine

"Personally, I find using ChartConnect cuts down on transcription since it's so easy to key in information."

- Dr. Mark Spencer, Cascade Family Medical Group
